Vortex

Vortex, for piano.
Duration: 6 minutes.

The most salient aspects of this piece can be found in its rhythmic world. Constant fluctuations and changes of meter leave us with a sense of unpredictable instability. Irregular rhythms are often introduced by surprise after sections where a constant pulse has been dominating. The harmonic content is based primarily on harsh dissonances such as the interval of 7th and its inversion, the minor 2nd. It is a virtuoso piece that allows the interpreter to display different moods and characters. Contrasts, especially in dynamics, are used as a propulsive element.
